20

1. A gaming machine comprising:

a front panel attached to a front of a main body and being formed an opening;

a medal storage unit attached to the front panel and configured to store a medal provided from the opening; and

a guide member attached to the main body and configured to guide the medal into the opening,

wherein the opening has a projection disposed in a vicinity thereof, and the projection is projected from an inner face of the guide member.

2. A gaming machine comprising:

a front panel attached to a front of a main body and being formed an opening;

a medal storage unit attached to the front panel and configured to store a medal provided from the opening;

a guide member attached to the main body and configured to guide the medal into the opening; and

a cover member configured to cover the guide member and having a projection disposed in a vicinity of the opening.

- 3. The gaming machine as claimed in claim 1, wherein the projection extends in a width direction of the guide member.
- 4. The gaming machine as claimed in claim 1, wherein the guide member is made of a resin.
- 25 5. A gaming machine comprising:

- a front panel attached to a front of a main body and being formed an opening;
- a medal storage unit attached to the front panel and configured to store a medal provided from the opening; and
- a guide member attached to the main body and configured to guide the medal into the opening,

5

wherein a lower face of the opening is positioned below a lower inner face of the guide member.
